marble / wood / baked clay

PROJECT DEVELOPMENT

1. ANALYSIS AND REQUIREMENTS

The **inspection of the spaces** and an accurate study of **customer's needs** allows to choose the hypothetical elements that will be part of the project and that will be discussed together with the customer during the second meeting.

2. SOLUTIONS AND MOOD

The meetings aim at a more specific **study** of the solutions, priorities and hypothetical materials to use, in order to discover what the customer's **concept** is and to **estimate the time and costs** of the project.

3. PROJECT DEVELOPMENT

The real **analysis of the final outcome** and the possibility to revise it is possible thanks to the **innovative software** used for developing the project.

4. The customer's point of reference

Periodically, the **customer is invited** to verify, in the yard or at our office, the **work progress**.

5. DETAILS AND FINISHES

The finishing step and the **final meetings** are fundamental as the customer has the possibility to discuss, outline or **revise the last details** before the final completion of the works.

6. TURNKEY

A qualified team, selected and charged by us, will accurately and **minutely arrange the spaces** so that the customer can enjoy and live them promptly.

THE CONCEPT AND THE EXPECTATIONS OF THE
CUSTOMER ARE THE BASIS OF A SUCCESSFUL PROJECT.
